## Tree Plantation on Dr. Kalaingar Karunanidhi's Birthday

Tree plantation inside the campus is a commendable initiative that brings numerous benefits to both the environment and the community. On June 03, 2022, green environment cell conducted the tree plantation inside our campus for Dr. Kalaingar Karunanidhi's birthday. A total of 50 volunteers participated in tree planting, and this program benefited to 1000 members. By increasing the green cover within our campus, we contribute to the reduction of greenhouse gases, mitigating the effects of climate change. Incorporating tree plantation within our campus is a tangible and impactful way to contribute to the well-being of our environment and community. It symbolizes our commitment to sustainability, providing a lasting legacy for current and future generations. Let us embrace the responsibility of nurturing a green campus, fostering a harmonious balance between nature and education.

## Tree Plantation on Independence Day Celebration

NSS cell of NSCET conducted a Tree Plantation Program on Independence Day Celebration on 15.08.2022 from 9.30 AM. A total of 50 volunteers participated in tree planting, and this Programme benefited to 1000 members. Tree plantation is a critical component of environmental stewardship and sustainable development. It plays a vital role in addressing global environmental issues and promoting a healthier planet for current and future generations. Many organizations, governments, and individuals engage in tree plantation initiatives as part of their efforts to combat deforestation and climate change.

## Poster Presentation on World Ozone Day Celebration

Green Environment cell of NSCET conducted a Poster Presentation Competition on World Ozone Day Celebration on 16.09.2022. World Ozone Day is observed annually to raise awareness about the crucial role of the ozone layer in preserving life on Earth. It serves as a reminder that individuals, communities, industries, and governments all play crucial roles in protecting the ozone layer. Through responsible consumption, waste reduction, and the adoption of ozone-friendly technologies, everyone can contribute to sustaining a healthy atmosphere. Educational programs and events are organized worldwide on World Ozone Day to inform people about the importance of ozone protection. It provides an opportunity to reflect on the positive outcomes of global collaboration and the capacity of humanity to address environmental issues effectively.

## Sapling Plantation in our Campus

Planting saplings on a campus, whether it's a school, college, university, business office, or other institution, has several environmental and aesthetic benefits. On November 18, 2022, a green project in the form of a tree planting was organized on our NSCET campus. A total of 50 volunteers participated in tree planting, and this program benefited 1000 members. A well-kept green campus is visually appealing and can provide a calm and pleasant environment for students, employees, and visitors. Green spaces have been demonstrated to lower stress and boost mental health. They provide a place for rest and reflection. Well-kept campuses with plenty of greenery tend to have greater property prices, which might benefit educational institutions or real estate developers. It's worth noting that the option.

## Planting of Saplings of Trees in our Campus

Planting saplings in your campus is a proactive and environmentally responsible endeavor that involves the deliberate cultivation of young trees to enhance the natural beauty, biodiversity, and sustainability of your campus environment. Green initiative was arranged in the form of a tree plantation in our NSCET campus on 26.01.2023. The NSS Volunteers and other interested students were educated and nourished with valuable points by many dignitaries therefore the students shall enunciate the importance of protective the nature among the literate and especially to the illiterate. Then the dignitaries and students planted the saplings in our college premises.
