Energy Policy

Date of Implementation	26.12.2021
Policy Type	Energy Policy

The Environment and Energy usage policy of Nadar Saraswathi College of Engineering & Technology (NSCET) is implemented to manage the energy resources in a systematic manner to minimize the environmental impacts.

The policy mandates the exploration of renewable energy resources to alleviate the government's burden and offer alternative solutions to the energy crisis. It is obligatory for all components of the institutions, encompassing stakeholders, and is applicable to all activities conducted by the institution.

It enables us to integrate efficiency and environmental consciousness into our daily operations, fostering a heightened awareness of our responsibilities and commitment to the conservation of natural resources, and restricting their usage.

The Green Environmental Cell is dedicated to promoting environmental awareness, initiating green projects, and implementing green literacy programs to conserve energy and safeguard the environment.

Policies:

- To mitigate air pollution emissions, we aim to promote the use of environmentally friendly vehicles and the development of pedestrian-friendly roads.
- To install photovoltaic solar panels for generation of green energy.
- To install LED bulbs in the campus to save energy.

The policies are disseminated to both students and employees through internal communication channels, and they are also accessible to all stakeholders on the institutional website. The Environment and Energy policy, along with its objectives and targets, undergo regular reviews by the convener and members of the Green Environment Cell, guided by the college principal.

Green Campus Policy

Date of Implementation	26.12.2021
Policy Type	Green Campus Policy

NSCET is dedicated to transforming its campus into a hub where education seamlessly integrates with environmentally conscious practices to advance sustainable development by

- **Restricted Entry of Vehicles**

To access the campus, all college vehicles and staff members personal vehicles are required to possess emission certifications, ensuring compliance before entry is permitted. Additionally, the college actively promotes the utilization of its transport facilities among employee and students as a measure to curtail emissions, fostering a culture of environmentally conscious commuting.

- **Use of Battery powered Vehicles**

The college employs battery-powered vehicles for internal transportation purposes. Moreover, the campus ensures that the electricity utilized is generated through Green Technology, contributing to a sustainable and eco-friendly energy supply within the premises.

- **Pedestrian- friendly Pathways**

At our NSCET Campus, we take pride in establishing pedestrian-friendly pathways throughout all our buildings. These pathways are thoughtfully marked with suitable logos/signage, ensuring clear and safe passage for pedestrians within the campus premises.

- **Ban on use of plastics**

NSCET is deeply committed to creating a plastic-free campus environment. To uphold this commitment, the NSCET Campus strictly prohibits the use of single-use plastics, aiming to foster a sustainable and eco-conscious atmosphere.

- **Landscaping with trees and plants**

NSCET is actively advancing towards becoming a green institution in Theni by extensively planting saplings of trees both within and beyond the campus premises. We focus on cultivating medicinal and fruit-bearing plants and trees, fostering a conducive environment.

Encouraging faculty, staff, and students to collectively contribute to the development of an eco-friendly and sustainable campus is a priority. Moreover, we aim to spread the ethos of an eco-friendly culture not only within our community but also to neighboring areas, whenever feasible.
